

2016-2023 Volunteer Demographic Data Reporting

How to Use & Read This Report

This report represents data collected over 2016-2023 from a demographic survey of WIMDI's volunteers.

Reporting Categories & Subcategories

As part of our survey and reporting design, we have placed a number of safeguards in place to protect the privacy and anonymity of our speakers. Some of these policies affect how we choose to report our data here.

Due to privacy concerns, a relatively small number of volunteers (21), and a small number of survey respondents (10), we cannot report across all of the subcategories of information we collect about our speakers. We report subcategories only when there are 5 or more members in it.

Until such time as we've had enough volunteers to break out useful subcategories, we cannot report on the demographics of our volunteer base. We will update this report when we have enough volunteers to report on.
